

## RESEARCH COTTRELL COOLING

# HURRICANE PREPAREDNESS

### TOP 5 PRE-STORM PREPAREDNESS

- 1.) Inspect casings, louvers, and resecure fasteners
- 2.) Inspect and reinforce fan stack and segment hardware
- 3.) Secure access doors and panels
- 4.) Install fan locks on mechanicals for safety
- 5.) Create an inventory of tower parts for quick and accurate ordering

INTEGRATED SOLUTIONS FOR A CLEAN ENVIRONMENT

## HURRICANE READINESS

Research Cottrell Cooling is here, with their many years of experience, to help you prepare for the 2021 hurricane season. Research Cottrell Cooling has many styles of fan locking mechanisms no matter what brand or design of cooling towers you may have. Additionally, hurricanes are not the only threat to cooling towers; any severe weather system can wreak havoc on your units. Don't be caught unprepared - partner with Research Cottrell Cooling, and let us help with your severe weather preparedness program to help mitigate unwanted downtime.

### Incoming Storm

- Secure fans
- Secure loose items on the fan deck
- Power down fan motors
- Call to schedule personnel for post inspections

### Post Storm Checklist

- Look for missing casing panels and louvers
- Inspect stairs and ladders
- Check for fan stack movement and fan blade damage
- Look for structural damage
- Review for broken piping
- Examine structural racking
- Contact [partsusa@hamon.com](mailto:partsusa@hamon.com)
